

2024 *EN ANALYTICS* TOP 100 SENIOR HIGH SCHOOL RANKINGS FOR NATIONAL SCIENCE AND MATHS QUIZ (NSMQ)

The *EN Analytics* Top 100 Senior High School Rankings for the National Science and Maths Quiz competition is based on data from 229 senior high schools across the sixteen regions of Ghana. Our ranking is globally accepted and universally trusted by students, teachers, government institutions and the general public. It has become the gold standard and the main source of reference for students seeking admission into secondary education in Ghana.

The 2024 rankings reveal how the landscape for mathematics and science education in Ghana is shifting. The ranking model is based on a school's final position in the National Science and Maths Quiz (NSMQ) at the national level and the Category of the school. This year's methodology has been significantly updated so that any school that qualifies to the national competition is automatically included in the ranking.

This is our ranking for the top 100 schools for the National Science and Maths Quiz competition for 2024:

National Rankings

2024 RANK	2023 RANK	SCHOOL	POINTS
1	1	Presec - Legon	690

5 Facts About the 2024 Rankings

Performances for the history books: Mfantshipim's performances in the 2024 edition of the NSMQ will find its place in the annals of the competition. Their ability to entice their opponents into the riddle segment and knock them out was a novel. They knocked out Prempeh College, Presec-Legon and defeated St. Augustine's college enroute to lifting the trophy.

St. Augustine's College breaks into top 10 : St. Augustine's College broke into the top 10 for the first time since our rankings began four year ago. It is currently ranked 8th nationally and 3rd regionally.

A very good year for Central Region schools: Central region dominated this year's competition from the beginning till end. The region had 6 schools at the quarter finals stage, 4 schools at the semifinals stage, and two schools in the finals who came in first and second respectively.

Apam is the school with the most significant upward movement in the 2024 rankings. It moved 19 places up from 71st in 2023 to 52nd in 2024. Other significant movers include Mpraeso SHS (84th in 2023 to 70th in 2024), and St. John's School, Sekondi (from 65th in 2023 to 52nd in 2024)

Regional disparities: There are significant regional disparities as schools from the newly created regions lack the infrastructure and facilities to compete. Since our rankings began in 2021, no school from Ahafo, North East, Savannah and Western North has made it into the top 100 rankings.

ABOUT EN ANALYTICS SHS RANKINGS FOR 2024

The Table is based on the performance of schools in the National Science and Math Quiz(NSMQ) since 2013. A school's position on the log is determined by the **competitions points** it has amassed over the period as well as the *category of the school* assigned to it by the Ghana Education Service (GES). The total points obtained are then exponentially smoothened to place more emphasis on current years. A school's position is not determined by this year's performance alone. Instead, its position is a reflection of its cumulative performance over the last 12 years. Regional competitions do not count in determining the position of a school on the Table.

Apart from the national rankings, we have also produced regional rankings which give opportunity to schools that are ranked outside the national top 100 to be featured in the regional rankings. A school that is not in the national rankings nor the regional rankings is classified as “unranked”.

Ranking Methodology

Competition Points

Beginning from this year, we have updated our methodology to ensure that all schools that qualify for the national competition get competition points and are included in the rankings. This is a departure from our previous methodology where the One-Eighth stage was the baseline for inclusion in the rankings. Since 2013, some 229 schools have qualified for the national competition. Competition points are based on the following rules:

- The competition points a school gets for a particular year is based on the **final stage** it reaches in the competition and not the points a school gets from the contest.
- The competition points used in the ranking are **those assigned by the model**, not the points a school gets in a particular contest.
- If a school fails to qualify for the national competition for a particular year, it gets zero competition points for that year.
- Any school that did not qualify for the 2024 national completion nor reached the One-Eighth stage at least once in the previous 11 editions is not ranked either at the national level or at the regional level.

How Are Competition Points Awarded

Final Position	Competition Points Awarded
Winning the competition	100
First runner up	70
Second runner up	60
Semi- Final 2nd place	45
Semi -Final 3rd place	40
Quarter Final 2nd place	25
Quarter Final 3rd place	20
One-Eighth 2 nd place	12
One-Eighth 3 rd place	9
Preliminary 2 nd place	4
Preliminary 3 rd place	2

Category Points

In addition to the competition points above, a non-category A school **may** get additional points based on the category assigned to it by the Ghana Education Service (GES). A non-category A school must advance **beyond** the One-Eighth stage before it can earn Category Points. It is therefore not automatic. Category B, C, and F schools must prove their worth by reaching at least the Quarter Final stage before they are awarded category points. The model uses category points to re-scale the competition field to compensate for lack of science infrastructure in category B, C, and F schools. Below are how category points are awarded:

How Are Category Points Awarded

Category	For Reaching Quarter Finals	For Reaching Semi Finals	For Reaching Finals
A	0	0	0
B	5	7.5	10
C & F	10	15	20

Dealing with ties

We have adopted the following conventions when ties occur:

- If two schools have the same points but one has won the competition before, or has won the competition more times than the other, then the one who has won the competition before or more times will be ranked ahead of the other even though they have the same points.
- If there is a tie and none has won the competition before, then they will be jointly ranked.

Why 2013 as the Starting Year

- The current format of the NSMQ started in 2013. There was a complete evolution of the structure of the competition in 2013. First, the number of participating schools for each contest was increased from 2 to 3. Second, the number of schools at the One-Eighth stage was increased from 40 to the current 81.

REGIONAL RANKINGS

The region-specific rankings are aimed at making the rankings more meaningful to students, teachers and stakeholders in the regions. The regional rankings include the 129 schools that are in the EN Analytics rankings but could not make it into the top 100 in the national rankings.

About the Author of this research

The lead researcher and the brain behind this model and rankings is Ebenezer Nimako Nyarko, the founder and CEO of EN Analytics and Consulting Limited. He is an actuarial analyst, a data scientist and a quant professional. He holds an MSc in actuarial science from the University of Leicester, UK, and an MSc in statistics from the University of Cape Coast. He is currently a PHD candidate in Finance at the University of Ghana Business School, Legon. He obtained his bachelor's degree in Mathematics from the Kwame Nkrumah University of Science and Technology (KNUST), Kumasi.

At the professional level, he holds the Diploma in Actuarial Techniques (DAT) qualification from the Institute and Faculty of Actuaries (IFoA), UK. His main areas of interest are predictive statistics, model development, data science, simulations, and pensions.

Prior to starting EN Analytics, he worked in the public sector where he performed quantitative analysis for the organisation and developed models for addressing national issues. He also served as an adjunct lecturer in actuarial science at the University of Cape Coast from 2016 to 2022.

About EN Analytics and Consulting Limited

EN Analytics and Consulting Limited is a data analytics firm based in Accra that provides training and consulting services for businesses. We help businesses structure their data and generate insight so as to make data-driven decisions. We provide training and consulting services in Power BI, Advanced Excel, Eviews, modelling, statistical analysis, research and analysis, forecasting and simulations. Our focus is to help organisations upscale the analytics and BI skills of their staff. And in so doing they can build models, improve their quantitative reporting, automate their processes, and make data more meaningful to their organisation
